Education

UNIVERSITÉ DU QUÉBEC À TROIS-RIVIÈRES

Bachelor's in computer science

Relevant Courses: Software Engineering, Databases, Algorithm Design,
Advanced Object Concepts, Computer Networks, Data Structures

Trois-Rivières, QC

December 2025

CÉGEP DE TROIS -RIVIÈRES

DEC Without Distinction

Relevant Courses: Computer Logic and Arithmetic, Operating Systems

Member of the troubleshooting team

Trois-Rivières, QC

December 2022

Skills and Projects

Programming: Java, C++, C#, SQL, Python, JavaScript, TypeScript

Design: JavaFX, React, Angular

Portfolio Website

Development of an interactive online portfolio using React to showcase my development projects through slideshows and videos. This dynamic website highlights my technical skills through a modern, smooth, and intuitive interface, offering an optimized user experience and clear navigation between different projects.

Restaurant Website

Design of an interactive website for a restaurant using Angular, featuring smooth online order management and a responsive interface for an optimized user experience on all devices. Order data is securely stored on a Docker server, with the integration of NestJS ensuring high performance and reliable transaction management.

Lazy Cat Game

Development of a multiplayer game based on a client-server architecture using the TCP protocol. The intuitive graphical interface allows players to communicate in real time, providing an interactive and smooth experience. The connection and data exchange system ensures effective synchronization among participants, thus optimizing multiplayer engagement.

Experience

SUBWAY

Assistant Manager

Trois-Rivières, QC

March 2021 - Present

- Supervise and train a small team of employees, ensuring high performance and good team cohesion.
- Monitor inventory levels and place replenishment orders.
- Optimize inventory management to minimize shortages and surpluses while reducing losses.
- Implement customer service initiatives to enhance loyalty and engagement.
